Over 5 years of customer service experience • Multi-tasker and collaborator • Trained over 25 people
Achieved 95% of projected sales in food service while being under-staffed • Opening team member for new business

PROJECTS

Sauti Africa Market Prices API • Back-End • Sep 2019 - Nov 2019

A stakeholder from Sauti Africa asked us to build an interactive experience for researchers & policymakers to interact with Sauti's Database on Market Prices and Developer API with extensive documentation for any developer to build any custom application or pursue data retrieval.

- Led pair-programming sessions to integrate external database to Node Server
- Planned daily & weekly objectives and coordinated with team on task queue
- Created end-to-end tests for API requests
- Designed and tested custom validation middleware for handling API requests
- Wrote comprehensive documentation for users and developers with GIF examples
- Conducted code reviews and incorporated feedback to improve development

Project Link: <https://price-api.live/>

Fifth Wheel • Front-End • Aug 2019

Fifth Wheel is a mock concept for an Airbnb-like app for RV owners. This project was built in under 4 days using React, SASS, Redux, Express, JWT, and PostgreSQL by 4 React developers and a Node/Express developer.

- Led two React developers to build and design user interface components
- Pair-programmed to developed global state management via Redux
- Integrated CRUD operations within Redux
- Assisted in usage of Semantic UI React library with SCSS
- Continuous integration and deployment of production site via Zeit
- Features of the App: Onboarding of users and usage of RV Marketplace
